Purchased.

From the collection of the
late Prof. William Gibson

(received March 1868)

Formerly No 1.

W

May 13th 1868.

Wax preparation showing
the external anatomy
of the eye, distribution
of the second, third, fourth & sixth
nerves.

Made in Paris.

Anat
F. 1

A demonstration, life size, of the eye and its appendages, a vertical section of the globe being supposed to be made.

99
F. 2.

Purchased from the collection of the late Prof. Wm. Gibson
(May 1st 1868)

Ant

May 13th 1868

A wax preparation showing the vessels of the choroid, the ciliary processes, etc. much enlarged.

100
F. 3.

Purchased from the collection of the late Prof. Wm. Gibson
(rec'd May 1st 1868)

missing

May 13th 1868

A wax preparation, illustrating a horizontal section of the globe of the eye. The retina is layered back to display the choroid.

Purchased from the collection of the late Prof. William Gibson.
(rec'd May 1st 1868)

Ant

Discarded January 24, 1900.

May 13th 1868

A wax preparation giving a demonstration of the superficial muscles, vessels and nerves of the right side of the head and face.

Purchased from the collection of the late Prof. William Gibson
(rec'd May 1st 1868)

Made by Dr. Josef Chiappi of Florence 1814.

May 13th 1868

A wax preparation illustrating the anatomy 103
of the mouth, nares, F. 6.
orbit and left portion
of the base of the skull
marked "Wm Gibson"
but probably made
by Chiappi in 1816.

Purchased from the collection
of the late Prof. William Gibson
(rec'd May 1st 1888)

May 13th 1888.

A wax preparation demon-
strating convolutions of 104
cerebral hemispheres F. 7.
longitudinal sinus, the
falx, tentorium, etc.
Made by Josef Chiappi

Purchased from the collection
of the late Prof. William Gibson
(rec'd May 1st 1888.)

May 13th 1888.

A wax preparation, by
Chiappi, illustrating 105
the parts seen upon a F. 8.
section through the great
longitudinal fissure
the corpus callosum,
the left lobe of the cerebellum,
the nasal and buccal cavities

Purchased from the collection
of the late Prof. William Gibson.
(rec'd May 1st 1888)

May 13th 1888.

A wax preparation illustrating
the parts seen by a horizontal 106
section through the lateral F. 9.
ventricles
made by Chiappi

Purchased from the collection
of the late Prof. Wm Gibson.
(rec'd May 1st 1888.)

May 13. 68.

A wax preparation illustrating the parts seen by a horizontal section through the lateral ventricles at a higher level than the preceding specimen.
made by Chiappi.

107
F. 10.

Purchased from the collection of the late Prof. Wm Gibson M.D.
(May 1. 68)

May 13. 1868.

A wax preparation showing the parts seen on a section of the hemispheres and lobes of the cerebellum, especially to show the 3^d & 4th ventricles.

108
F. 11.

Purchased from the collection of the late Prof Wm Gibson M.D.
(rec^d May 1. 68)

May 13. 68

A wax preparation showing the cerebral hemispheres laid apart laterally, exhibiting the crura etc.

109
F. 12.

Purchased from the collection of the late Prof. Wm Gibson M.D.
(rec^d May 1. 68)

May 13. 68

A wax preparation showing the origin of the several of the cranial nerves.

110
F. 13.

Purchased from the collection of the late Prof. Wm Gibson M.D.
(rec^d May 1. 68)

May 13. 68.

A defaced cranium
Exhumed at Yorktown.
A continuation of the ^{temporal} parietal
~~temporal~~ suture formed with the
lambdoidal suture a very cu-
rious ~~specimen~~ specimen of Moniana

Purchased from the collection of
the late Prof Wm Gibson. m.d.
May 1st 1868.

The zygoma & upper
portion of right malar wanting
May 13. 1868.

May 13. 1868.

A ligamentous preparation
of the bones of the ^{left}~~right~~ foot, 112
taken from Surgical speci-
men ~~5378~~ 2164

~~Purchased from the collection
of the late Prof Wm. Gibson~~

Rec'd May 1st 86
From a patient and presently
Dr. H. S. Lincoln.

As the bones of the foot were not diseased they were put in the Anatomical Section.

Rec'd from 14th 1888
May 18th 1888.

Bones of the left foot.

Prepared and mounted as
a ligamentous preparation

Taken from Long Spec
5382 in which there
was a fracture of the
shafts of the tibia & fibula
but there was no disease
of the foot.

113
